Synergy of Sauna, Material Mastery and Innovation

Primewood is a tale of dedication to natural wood materials, quality and innovation. The company was founded in a historic manufacturing complex where wood has been processed for over a century. This rich historical heritage serves as both inspiration and a reason to continue honouring traditions while striving for innovative solutions. Our goal is to produce enduring products, ensuring that future generations can enjoy the same sauna experiences without harming the environment.

Our product range is rapidly expanding to meet the evolving needs of our customers in the sauna material industry. We can offer customized solutions that meet even the most demanding expectations. Every product we create is the result of precision and care, utilizing state-of-the-art machinery. This commitment to modern technology ensures that our sauna materials withstand the test of time and stand out in today's dynamic market.

Discover top-quality sauna materials designed for relaxation and enhancing design projects. Our selection includes premium wall panels, bench boards, and finishing elements, including bench modules and benches. Our company seamlessly combines traditions and innovation while preserving the craftsmanship spirit of wood processing.

Welcome to discover the world of sauna materials, where our craftsmanship and innovation synergize to create a unique sauna space that tells stories of relaxation and style.
